

LATEST DEVELOPMENTS - COMTRACK

30th March, 2015

Table of Contents

1. Back to Search Tab	2
2. Strengthening User Password Policy	3
3. Machine Registration to Login for Organization Users	5
4. Audit trail required with Date time Stamp for every Transaction and Modification.....	7

1. Back to Search Tab

System: CMSP / CMSE

“Back to Search” tab provided on all the view screens in CMSE and CMSP.

The screenshot displays the COMTRACK Community Management System interface. At the top, a navigation menu includes: Deposit, Transfer, Withdrawal Request, Settlement, Search, Reports, Aggregation, Pledging, Lot Management, Create, View, Billing, User Profile, and Audit Trail. The main header area shows the COMTRACK logo, a 'Welcome' message, a 'Home' button, and a 'Pending Transaction(s)' indicator with a question mark icon. Below this, the 'Client To Pool' screen is visible, showing a transaction number of CTP4062. A row of buttons includes 'ACK Receipt', 'Submit', 'Cancel', and 'Back To Search' (which is highlighted with a red box). The transaction details are as follows:

Date of Transaction	30/01/2015	Transaction Status	COMPLETED
CMSE Client ID		Exchange Code	NCDEX
CM Id		Trading Client Id	
Contract Code	RMSEED	TM ID	
Total Deliverable Quantity	10	Total Actual Quantity	9.998
CMSE Client Name		Instruction Slip No.	

At the bottom of the form, there are three buttons: 'Auto Select', 'Select Lot', and 'Reset'. A disclaimer at the very bottom reads: 'Disclaimer : Please note that any credit balance in the account or this statement is NOT a negotiable Warehouse Receipt'.

2. Strengthening User Password Policy

System: CMSP / CMSE

New password policy has been introduced, following changes have been implemented with reference to password policy:-

1. Password reset/expiry in 60 days.
2. In context to reset of password following norms have been set:-
 - Alphanumeric with special characters
 - Atleast one numeric is mandatory
 - Atleast one special character is mandatory
 - Length should be minimum 6 characters and maximum 16 characters

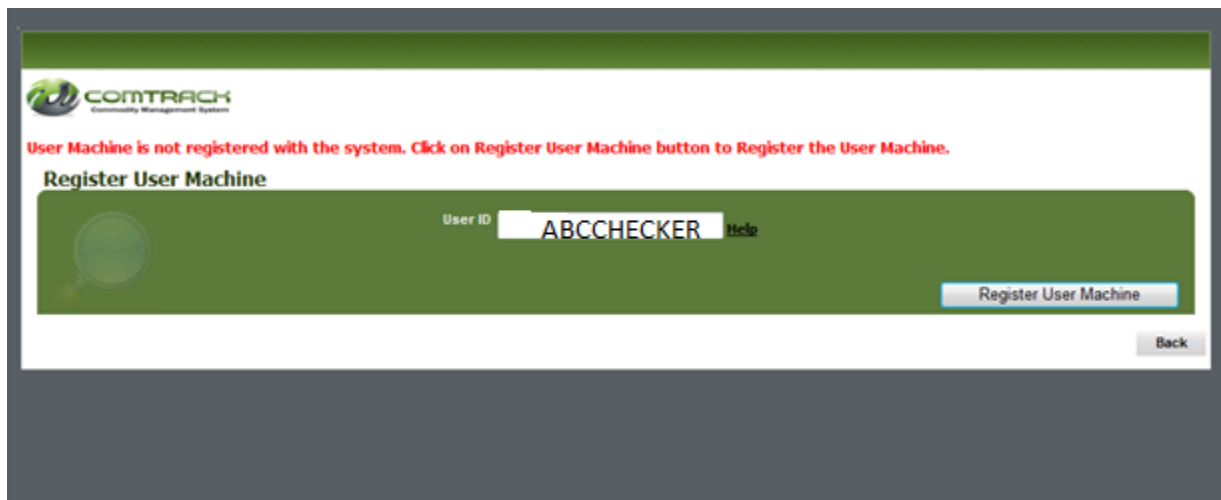

3. Machine Registration to Login for Organization Users

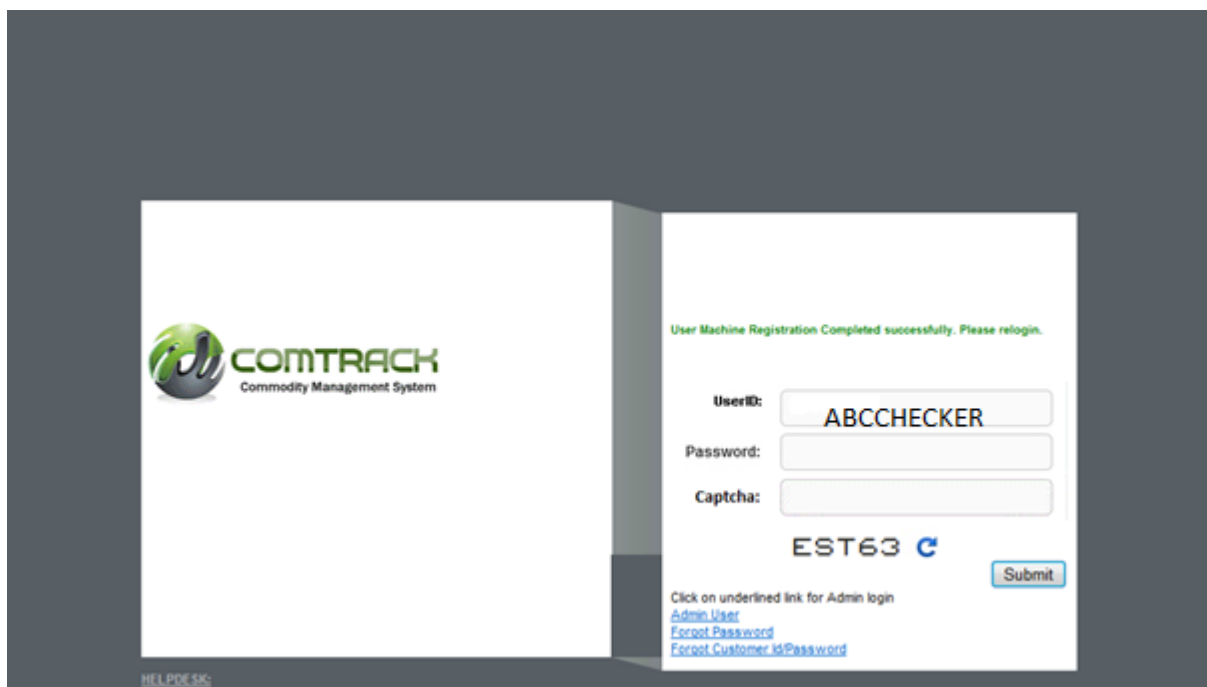

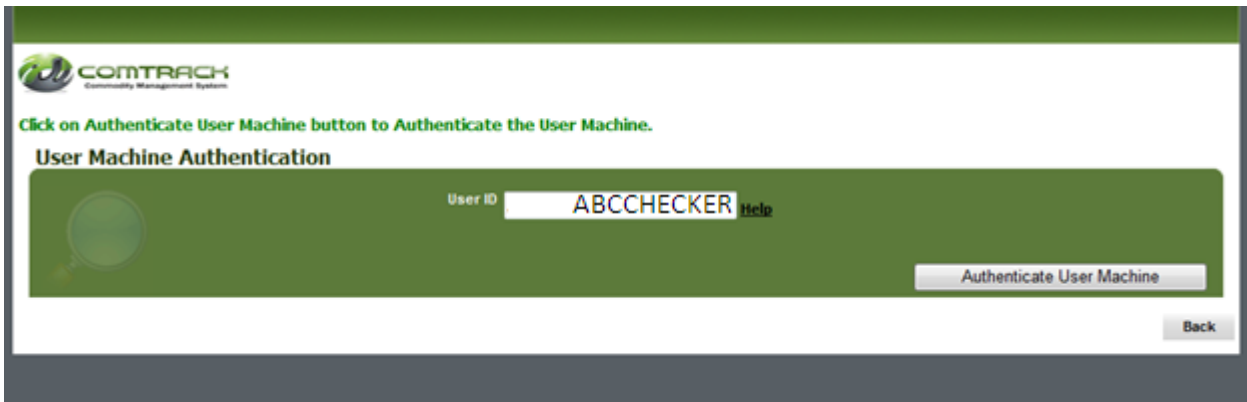

System: CMSP / CMSE

Note : Application works best with JRE (Java Runtime Environment) versions 1.7 and 1.8.

Machine registration functionality is introduced to facilitate secure login.

Every user must be registered against a machine. If that user is logged in through any other machine a message will pop up giving the following series of instructions given in the screen shots as below :-

After initiating the process of machine registration successfully this user can log in in through the other machine. A system generated email will be sent to registered email ID of that user intimating the user login through other machine.

4. Audit trail required with Date time Stamp for every Transaction and Modification

System: CMSP / CMSE

Audit trail functionality has been introduced to facilitate the user to extract transaction details for the selected type of transactions. Details would be generated in a excel file for the desired duration.
